

Noisy or Pleasant?

I don't need to pay a fee and I can hear his beautiful voice. There is a positive externality for me.

What happen?
It's so noisy

Because Leon has a concert.
I'm so excited!

But, I think it is too noisy.
It brings me negative externality.
His action affects me adversely
but he does not give compensation
to me.
I can't sleep well!

He should use an indoor place to hold a concert.

OK! We can send our opinion to his Facebook page.
